

**(a) soil**

**(b) bedrock**

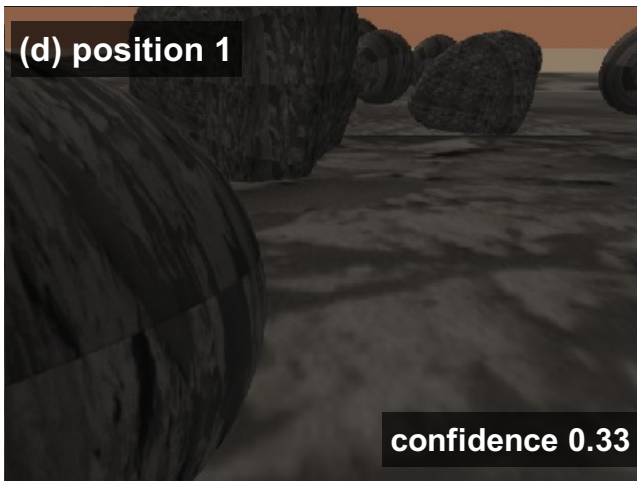

**(c) sand**

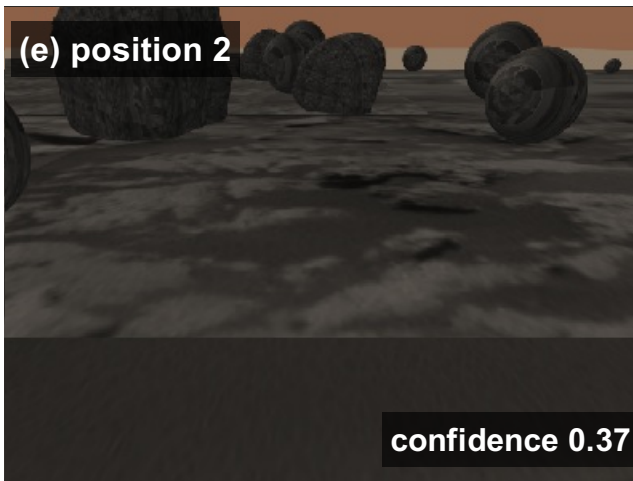

**one rock zone, scored at two positions**

**(d) position 1**

**confidence 0.33**

**(e) position 2**

**confidence 0.37**

### **Five views, four terrain types**

(d) and (e) are one rock zone scored at two spawn points 4 m apart. Same terrain, but not the same answer: both fall below the 0.40 threshold and STOP, and at a larger encoder one of the two does not (Section 4.10).
